

# LESI - Project Proposal - 2021

Eva Oliveira

April 2021

## 1 Web Project Rule

This year web project can be achieved by two means:

- presenting a web based project developed during the internship. It's only valid if:
  - uses web technologies (you must validate it)
  - your external supervisor confirms you developed it
- developing a project proposed in this document

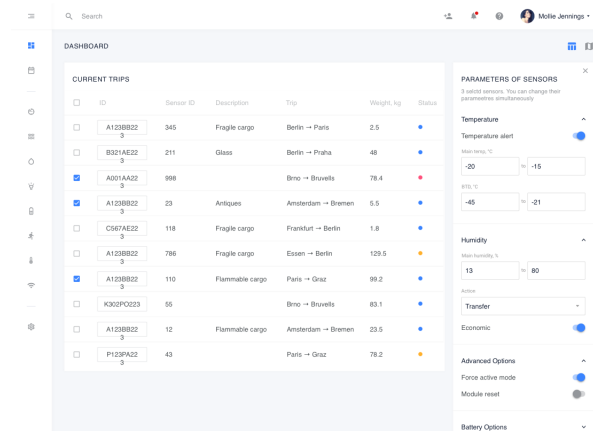

## 2 Requirements

In order to fully fill the knowledge requirements of Web Technologies and Multimedia, you'll need to develop a system that allows a teacher to manage its students' grades. The following pages resemble the main functionalities of the app. Here is a list of the main requirements:

- the app must allow its user to create/edit/delete new classes per course per year
- the app must allow to upload a csv with students per class per course per year
- the app must allow to define create/edit/delete evaluation component for each course
- the app must allow to insert/edit/delete every grade in every component
- the app must allow to create/edit/delete notes related to each class or regarding any student

### 2.1 Style to use

Please use this kind of style of dashboard

## 2.2 Graphical representation of some functionalities

here are some functionalities
